

OUTPUT

The screenshot shows a Linux desktop environment with a terminal window and a chatbot window. The terminal window displays the following commands and output:

```
(base) prakash@prakash-VivoBook-ASUSLaptop-X415JA-X415JA:~$ cd Chatbot
(base) prakash@prakash-VivoBook-ASUSLaptop-X415JA-X415JA:~/Chatbot$ ls
build          _config.yml    images          setup.cfg
chatbot        CONTRIBUTING.md LICENSE          setup.py
chatbotAI.egg-info dist            PULL_REQUEST_TEMPLATE.md test
CNAME          docs           README.md       TODO.md
CODE_OF_CONDUCT.md examples        requirement.txt
(base) prakash@prakash-VivoBook-ASUSLaptop-X415JA-X415JA:~/Chatbot$ python
Python 3.9.13 (main, Aug 25 2022, 23:26:10)
[GCC 11.2.0] :: Anaconda, Inc. on linux
Type "help", "copyright", "credits" or "license()" for more information.
>>> from chatbot import demo
>>> demo()
```

The chatbot window, titled "Sample ChatBot", shows a blue chatbot icon and a text input field. The chatbot has responded with the message "Hi, how are you?". The terminal window also shows the following code snippet:

```
18 try:
19     input
20 except NameError:
21     input
22
23 _version
24
25 DEFAULT_A
26 RE_TAG PA
27 RE_OPERAT
28 RE_NAMED
29 RE_NAMED
30 RE_NUMBER
31 RE_NUMBER
32
33
34 class MultifunctionCall:
35
36     def __init__(self, func=None):
37         self._func_ = {} if func is None else func
38
39     @staticmethod
40     def default_func(func_name, value):
```

Sample ChatBot

Can you elaborate on that?

do you know my name?

No, I do not know your name, Can you please tell me your name?

prakash paudel

Thank you prakash paudel

what is your name?

My name is ChatBot

nice to meet you chatbot.

Very interesting.
